

# RMTB

## TRITIUM SIGN

Power Free - No AC

Suitable for Hazardous Applications/Locations

12 year Lifespan

### Approvals:

Running Man Multipurpose signs are compliant to the CAN/ULC-S572 standard

### DESCRIPTION

The Stanpro RMTB series of self-luminous running man signs provide reliable signage for applications where typical signs cannot be employed. The RMTB series are completely non-electrical so they can be installed in any location, including glass entranceways/vestibules, greenhouses and outdoor applications. This also insures that the RMTB signs are non-sparking, making them ideal for explosion-proof locations. RMTB signs are not governed by the requirements of the C860 standard due to the non-electrical design of the light source.

### LIGHT SOURCE

- 12 year expected life
- The tubes are lined with phosphor which glows green in colour
- The light output is unaffected by extremes temperature or moisture
- Continuously illuminate at performance specifications for the rated duration
- The brightness of the light sources used in the sign are an average of 120 microlamberts

### MECHANICAL

- Tritium signs are supplied standard with a white, low profile thermoplastic frame
- The frame secures the thermoplastic face and stencil and allows for simple wall mounting
- An optional canopy easily attaches to the exit to facilitate ceiling mounting
- The tritium is sealed within several silicate tubes fitted into the ABS thermoplastic housing
- The light source requires no maintenance or service throughout the lifespan of the sign

### DIMENSIONS

Comes standard with three pictogram legends for direction selection.

### ORDERING GUIDE

RMTB	12Y		0	
Series	Life expectancy	Nbr of faces	Faces	Colour
RMTB	12Y - 12 years	1 - Single face 2 - Double face	0 - Universal faces	WH - White (standard) BK - Black GY - Grey
